Profile

Networking student at Info Myanmar College (HNC, in partnership with Edinburgh Napier University) with hands-on practice in Cisco Packet Tracer and VirtualBox, and a working base in Windows, programming, web development and databases. Completed SNE training and a CCNA course, and is now self-studying for the local CCNA certification. A calm, practical problem-solver who assesses a situation before acting and can lead or support depending on what the team needs. Aiming for a career in networking and cybersecurity.

Education

Higher National Certificate (HNC), Networking — *Foundation Programme from Nov 2025*

Info Myanmar College, in partnership with Edinburgh Napier University

- First semester completed. Second semester in progress.
- Coursework includes Computer Networking, Computer Science, ICT, Programming (Java and Python), HTML and CSS, Database Fundamentals, Computer Fundamentals, Mathematics and Professional Practice.

General Educational Development (GED) Certificate — *2025*

International General Certificate of Secondary Education (IGCSE) — *Completed*

Further Pure Mathematics, Mathematics B, ICT, Computer Science, English as a Second Language

Certifications and Training

System and Network Essentials (SNE) Certificate — *Completed*

- Computer hardware, Windows installation and configuration, disk and local user management, command line basics, antivirus, networking fundamentals and basic troubleshooting.

Network Cabling Certificate — *Completed*

Cisco CCNA 200-301 — *Course completed, self-studying for the local certification*

- IP addressing, switching and routing, VLANs, network devices, device configuration and troubleshooting concepts.

Technical Skills

Networking	Computer networking, IP addressing, switching and routing, VLANs, network design, network troubleshooting, CCNA-level knowledge
Systems and IT	PC hardware and assembly, Windows installation and configuration, basic system administration, Command Prompt and CLI, IT troubleshooting
Cybersecurity	Cybersecurity and network security fundamentals, defensive security concepts, independent security study
Programming	Python and Java, conditionals, loops and nested loops, problem solving through code
Web and database	HTML and CSS, page structure and styling, database design and development fundamentals
Tools	Cisco Packet Tracer, VirtualBox, GitHub, Microsoft Word, Microsoft PowerPoint

Projects and Practical Experience

WishValt, smart piggy bank application — *Group project, IT Project Show*

- Delivered in a group of four over 14 days. Users set a saving goal and a fixed daily amount, receive daily reminders, and the money stays locked until the goal is reached.
- Documentation and Communication role. Wrote the formal emails, meeting minutes, progress reports and poster, and planned the schedule and task list with a six-step prioritisation method.

Networking labs — *Cisco Packet Tracer*

- Designed and configured network topologies and practised configuration and troubleshooting in simulated environments, applying CCNA concepts to practical scenarios.

Programming, web and database projects *Academic*

- Built academic projects in Java and Python, basic websites in HTML and CSS, and databases applying data organisation and database management basics.

Computer hardware and systems *Hands-on practice*

- Assembled computers, installed and configured Windows, and used VirtualBox virtual machines for learning and experiments.

Soft Skills

Situational leadership assesses a team before deciding whether to lead or support

Communication states tasks and deadlines clearly and asks for help when needed

Adaptability adjusts responsibilities to the situation and the team

Accountability takes ownership of work and meets deadlines

Problem solving stays calm under pressure and looks for practical solutions

Critical thinking understands a situation before acting on it

Independent learning learns new technical subjects through research and practice

Attention to detail checks accuracy where it affects the final result

Languages

Burmese native **English** B2 **Japanese** JLPT N4

Professional Interests

Network security, network engineering, security engineering, IT infrastructure, cloud security, defensive security (blue team), security architecture, and governance, risk and compliance (GRC).
